In addition to the number of animals that were altered, consider including topics such as outreach and education success, community support, beneficial impacts to shelter intake and euthanasia rates in shelter in your target area, etc. Also include any ways you found to stretch you dollars further or make your project even more successful.

Be sure to use HARD RETURNS for new paragraphs to increase the readability of your text.
Lessons Learned:

This kind of information may help the program develop future updates to guidance and help the Advisory Board during the proposal review process.
