

# Analyses of Quarterly Survey Data from Animal Control Shelters/Animal Care Facilities in Maryland

Second Quarter 2016: April 1 to June 30

FINAL

11/11/2016

Maryland Department of Agriculture

Jane Mallory, Program Coordinator, Agency Grants Specialist

Maryland Department of Agriculture  
Spay and Neuter Program  
Second Quarter 2016 Survey Analyses  
(April 1- June 30, 2016)

As required by Agriculture Article §§ 2-1602 and 2-1605, Annotated Code of Maryland the second quarterly Animal Control Shelter/Animal Care Facilities survey for 2016 was conducted by Maryland Department of Agriculture (MDA) for the period of April 1, 2016 to June 30, 2016. The survey information requested included the total intake of dogs and cats during the quarter and a summary of the agencies' disposition of the animals.

Survey requests were sent to all facilities that reported in the previous quarters. (See Attachment 1 for list of Facilities).

### **Category Descriptions**

To fully understand the following data it is important to understand the definitions of the data categories for which the facilities were asked to report. The following describes the categories in further detail and how these are interpreted by the facilities.

*“Managed in Shelters”* or *“Under Care”* is the number of animals under the facility's care during the quarter. This is a combination of the *“Live Animal Count”* at the start of the quarter and *“Intake”*.

*“Live animal count”* is the number of animals in the facility at the beginning and end of the specified period. It should be noted that this number changes minute to minute (every time an animal comes and goes in the shelter), so the end of one quarter will not necessarily be the same as the beginning of the next quarter.

*“Intake”* refers to those animals coming into the facility during the specified time period. This includes animals surrendered by owners that do not want to keep the animal, or request the animal be euthanized, strays (many consisting of newly born litters), feral animals brought into the facility by citizens or animal control officers, and animals transferred from another agency, facility, or coalition that do not have all the necessary capabilities. Other live intakes may include animals taken in but put into a foster care program outside of the facility. Fostered animals while not housed in the facility are still considered the facility's responsibility and so are included in the Live Animal Count. Intake can also include impounded animals for various reasons (death of owner, owner incarcerated, owner hospitalized, etc.).

“*Disposition*” refers how an animal leaves the care of the shelter during the specified time period. This includes adopted out, returned to owner, transferred to another agency or facility, died/lost in care, and euthanized. This figure does not include those animals left in the facility’s care at the end of the quarter.

“*Relinquished by owner*” refers to animals surrendered to a facility by the person who had custody of the animal for more than 72 hours no longer wants the animal for whatever the reason. Reasons are wide-ranging but most frequently include behavioral problems, no longer want or can keep a pet, moving, or the surrender is an unwanted litter.

“*Died/Lost in Care*” represents animals that come in severely sick or injured (such as hit by car) and die shortly after arrival despite what the medical team (including a veterinarian) may have attempted in order to save its life. This category also includes neonatal kittens and puppies that are taken in all year long, with or without a mother. The percent that survive is very small, especially bottle babies.

“*Owner requested and all other euthanasia*” represents the animals that had to be put down for a variety of reasons. Although shelters intake information records the number of owner requesting euthanasia, many facilities will not euthanize a surrendered animal if it has been evaluated by the staff and medical team to be sound, treatable, rehabilitatable, and adoptable. Owner requested euthanasia also covers those instances that the health of the animal is dire and untreatable and humane euthanasia is the only option available to the owner.

Other reasons for euthanasia include severe behavioral problems that prevent adoption, poor and untreatable medical conditions, legal or court-ordered, and not adopted in the allotted time. It should also be noted that facilities that do carry out euthanasia often are the recipients of animals that have, for whatever reason, been turned away from no-kill shelters.

## **RESULTS**

Of the facilities that were sent the survey request, 26 facilities were required to report. In addition, several private shelters reported either voluntarily or as a condition of receiving funds from the Maryland Spay and Neuter Grants Program. Two facilities that are required to provide data failed to comply. Somerset County Animal Control failed to respond to the data request. Immediately following June 30, 2016, management of animal services and sheltering in Cecil County changed from a contracted private organization (A Buddy 4 Life) to management directly by the county. As per a conversation with Abigail Bingham, Director of Cecil County Animal Services, the former management of the facility failed to provide the new management with records for this time period.

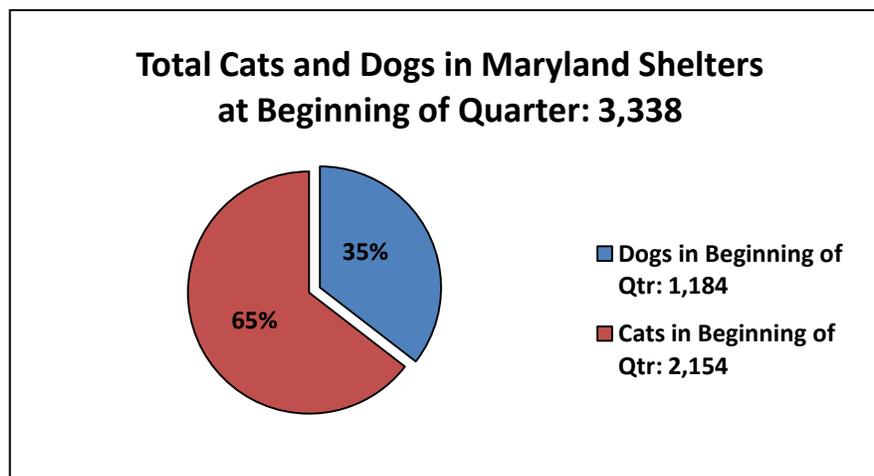

The following is a breakdown of the data compiled from the responses from the survey received back to MDA.

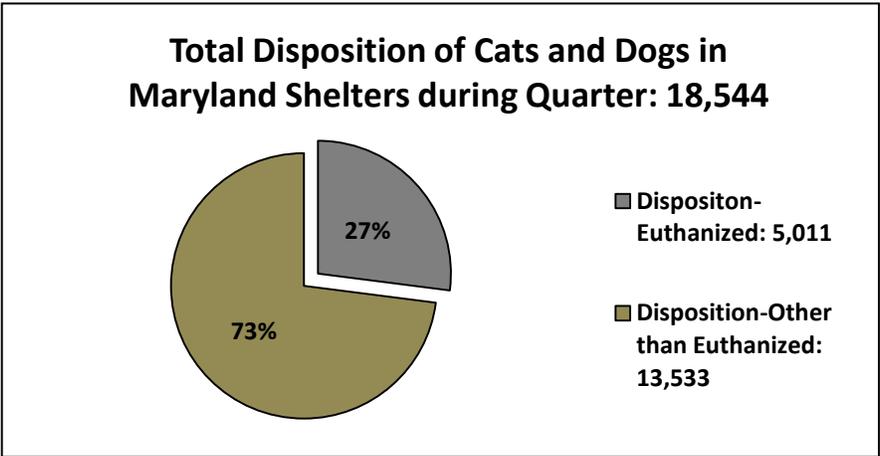

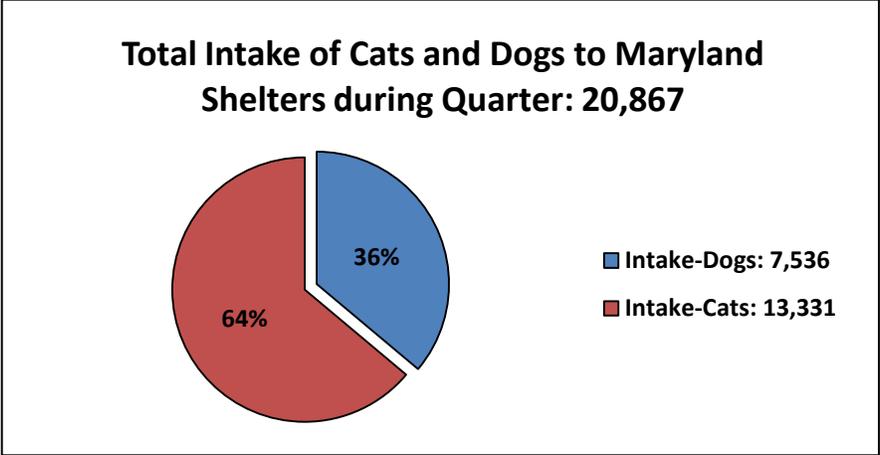

## Results Synopsis:

- Number of facilities contacted 31;
- Number of facilities responding: 28;
- Total of all dogs and cats in facilities state-wide **at the beginning** of the quarter: 3,338;
- Total **intake** of all dogs and cats to responding shelters during the quarter: 20,867;
- Total all dogs and cats **under the care** (beginning of quarter total plus intake during quarter) of responding shelters during quarter: 24,205 (36% dogs and 64% cats);
- Total **disposition** of all dogs and cats in responding shelters during quarter: 18,544;
- Total of all dogs and cats **remaining** in responding shelters at the end of the quarter: 5,661 (1,390 dogs and 4,271 cats);
- Total of all dogs and cats **euthanized** in responding shelters during this quarter: 5,011 (1,445 dogs and 3,566 cats);
- Percent of all dogs and cats **under shelter care** (under shelter care = beginning count plus total intake) by responding shelters **euthanized** during the quarter: 21%
- Of euthanized animals, 71% were cats and 29% were dogs.
- Total number of dogs **under the care** of responding shelters during quarter (number at beginning of quarter plus intake during quarter): 8,720;
- Percent of euthanized dogs from the total dogs in shelters: 16%;
- Total of all cats **under the care** of responding shelters during quarter (number at beginning of quarter plus intake during quarter): 15,485; and
- Percent of **euthanized** cats from the total cats **under shelter care**: 23%.

### Data Summaries

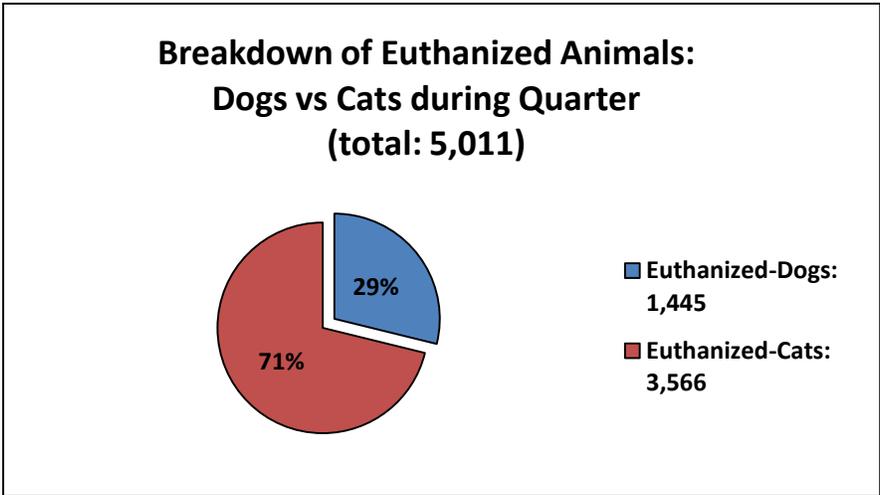

The following charts and graphs depict the data on dogs and cats under the care of Maryland shelters that responded to the survey request for the second quarter of 2016 (April-June 2016).

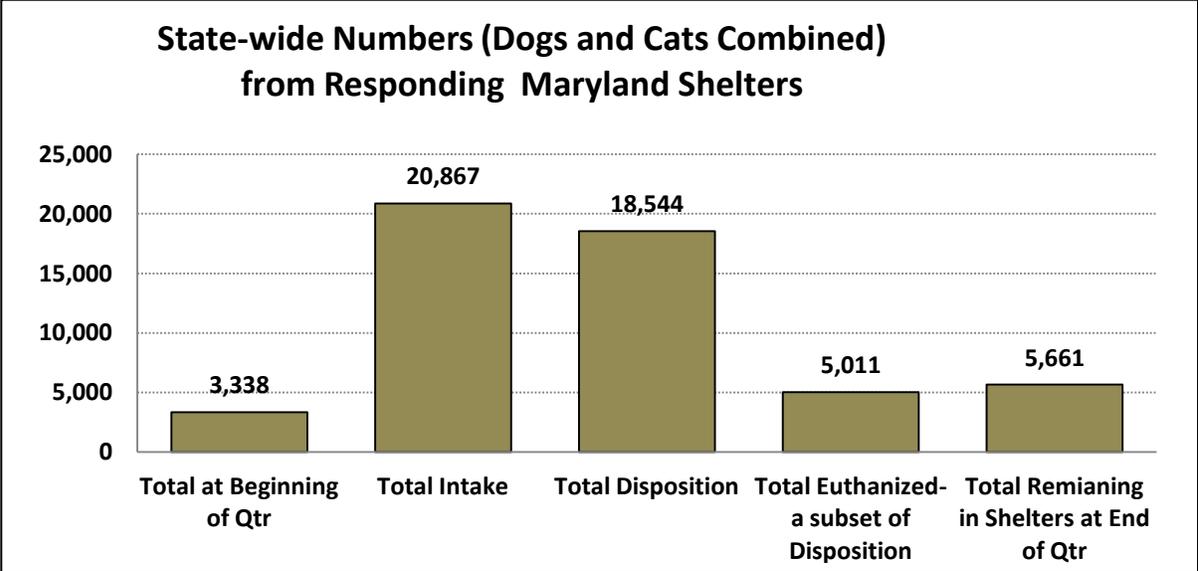

During the second quarter of 2016, 24,205 dogs and cats were under the care of reporting shelters. Of these animals, 18,544 under shelter care were either returned to owner, adopted, transferred to another facility, died/lost in care, or euthanized, with 5,661 remained in shelter care at the end of second quarter. As depicted in the above chart, 27% of the disposition was attributed to euthanasia, both owner requested and required by the shelters for various reasons.

During this quarter, a total of 5,011 cats and dogs were euthanized in responding Maryland shelters. As illustrated in the chart below, of the euthanized animals, 29% were dogs (1,445) and 71% were cats (3,566).

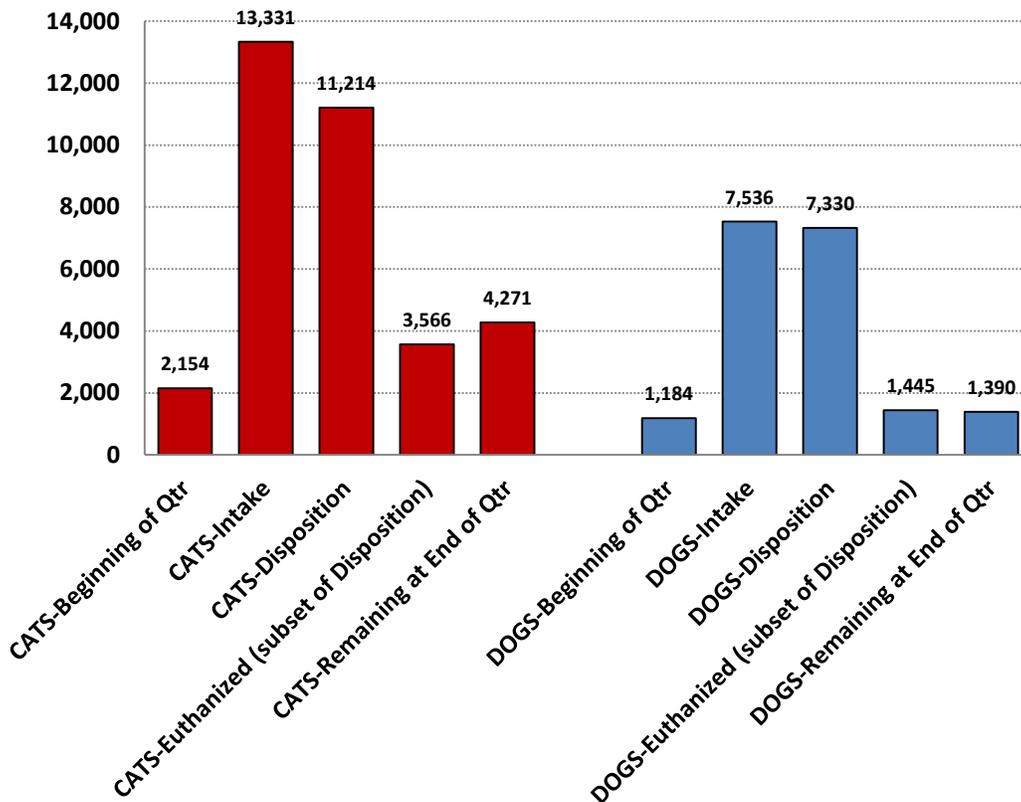

The chart below summarizes the data for all cats and dogs managed by the responding shelters.

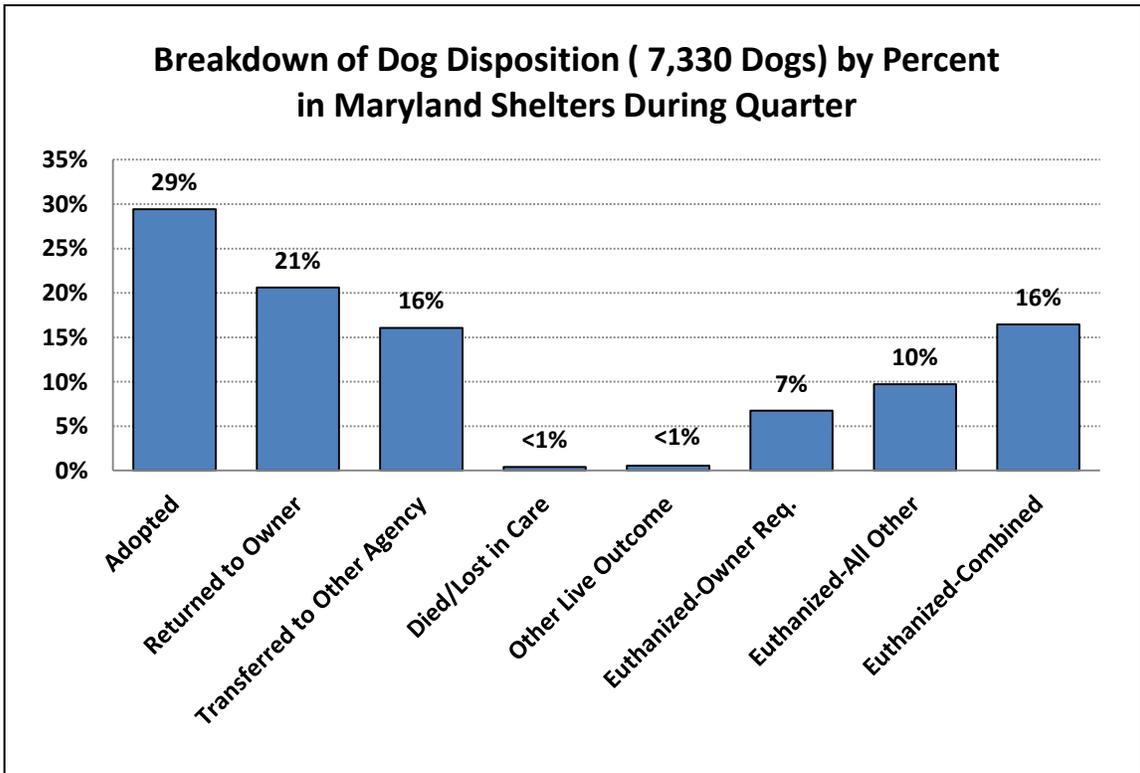

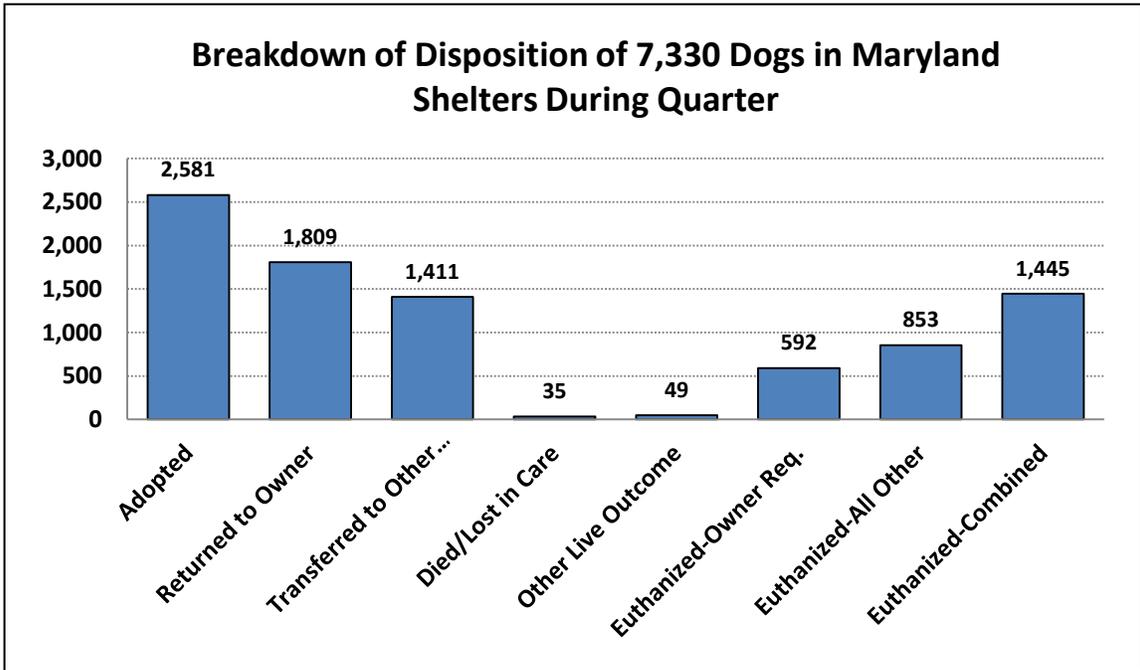

The chart below provides a side-by-side comparison of the data for cats and dogs from the responding shelters for this quarter.

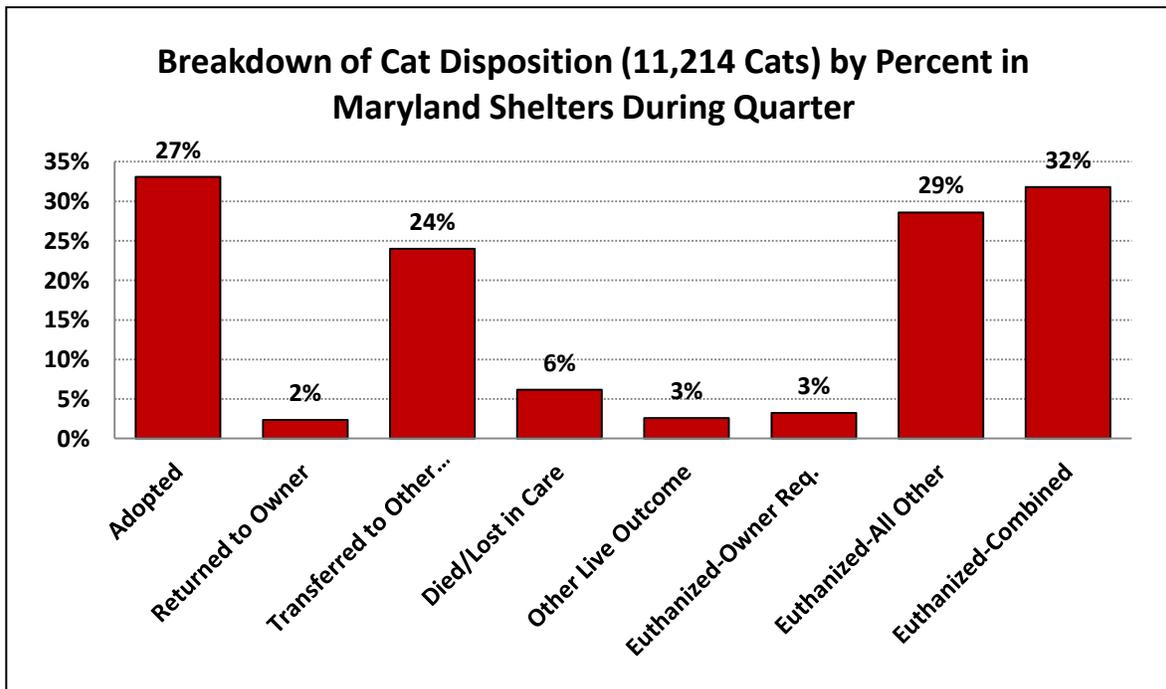

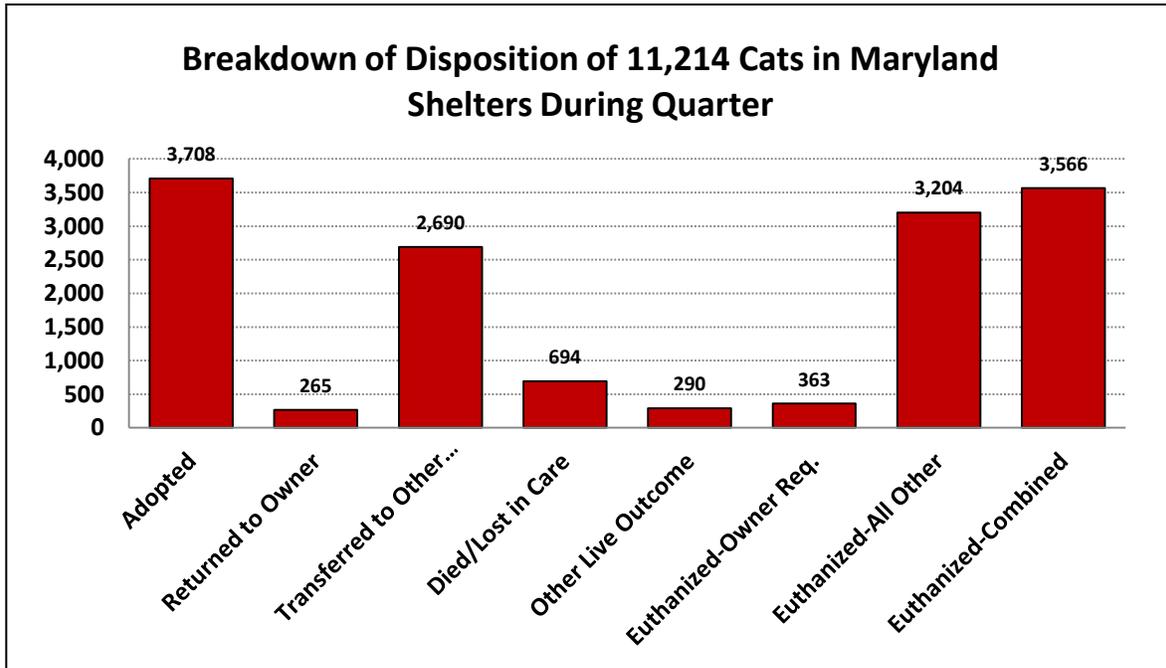

### State-wide Numbers: Cats vs. Dogs from Responding Maryland Shelters

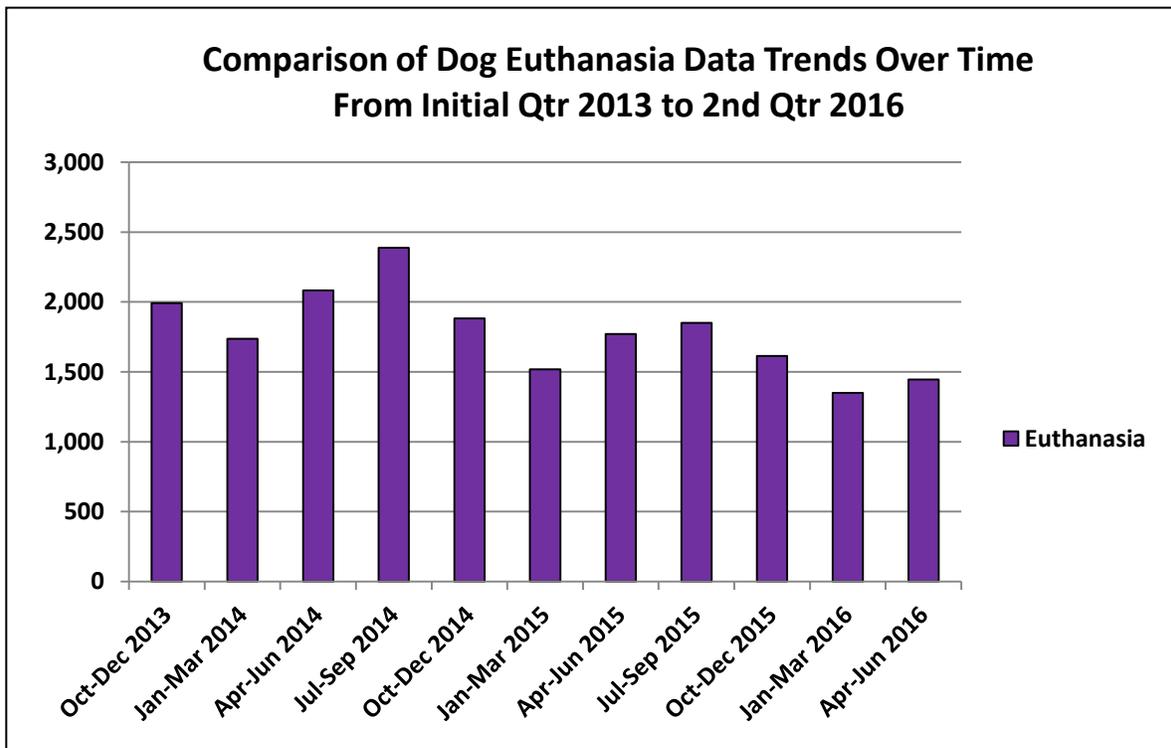

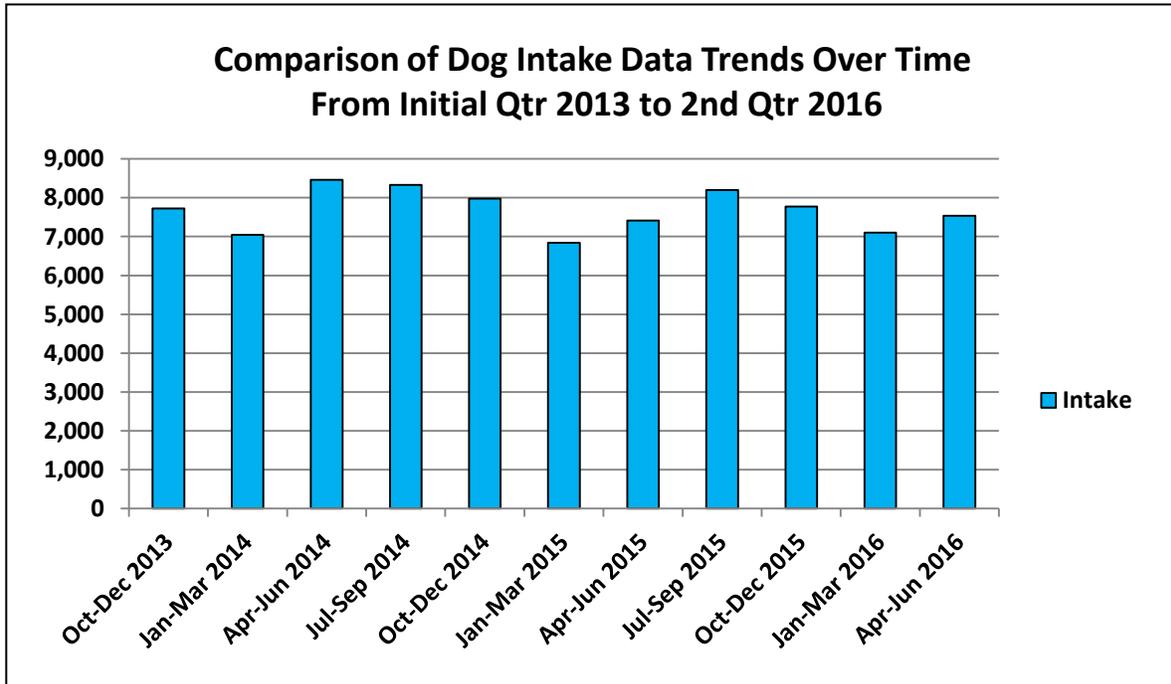

**Dog Disposition Data Summary:**

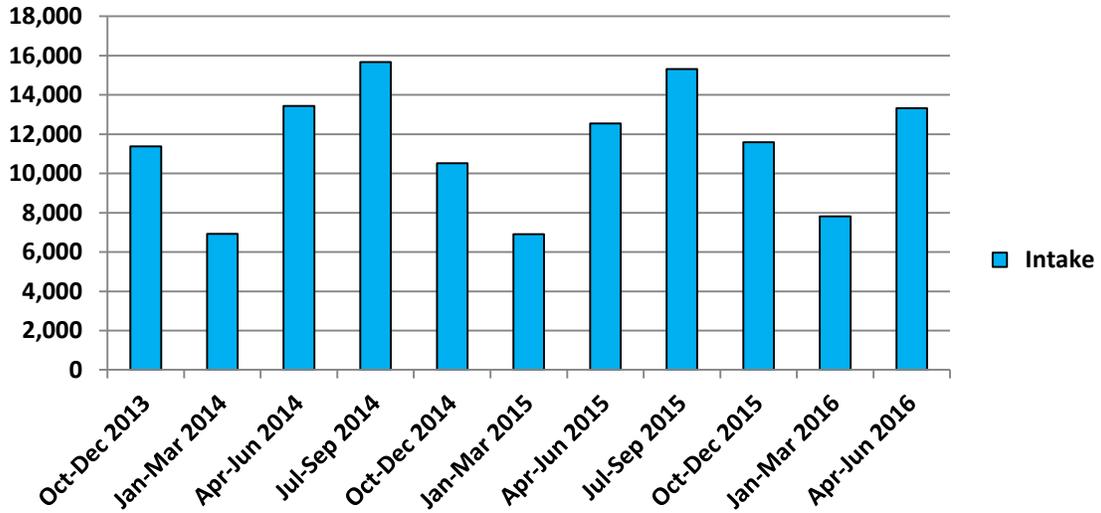

**Cat Disposition Data Summary:**

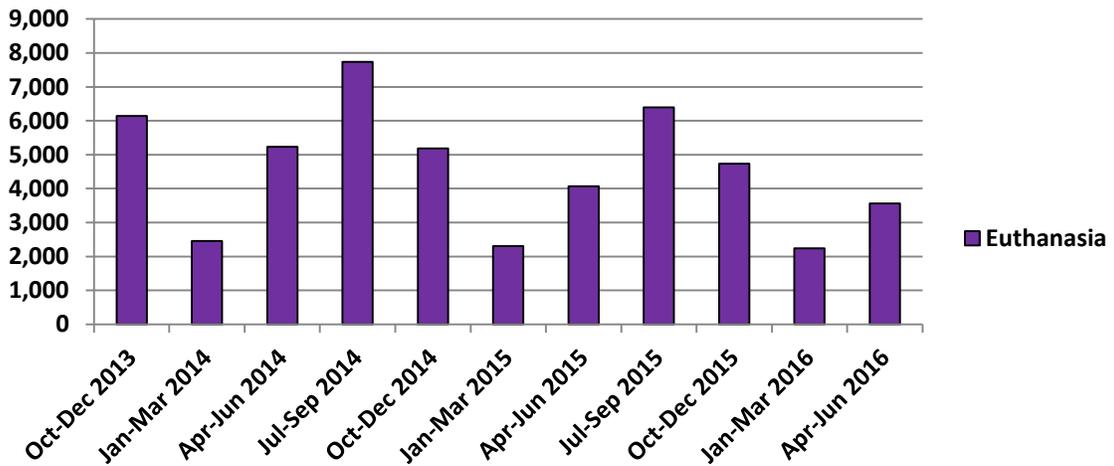

The following charts provide comparisons of state-wide dog and cat intake and euthanasia data from the initial quarter (October to December 2013 through the second quarter of 2016.

**Comparison of Cat Intake Data Trends Over Time From Initial Qtr 2013 to 2nd Qtr 2016**

**Comparison of Cat Euthanasia Data Trends Over Time From Initial Qtr 2013 to 2nd Qtr 2016**

**ATTACHMENT 1. LIST OF FACILITIES SENT SURVEY REQUEST AND RESPONDING WITH INFORMATION**

Facilities in italics are those not required to respond to survey according to Agriculture Article §§ 2-1602 and 2-1605, Annotated Code of Maryland but still provided data.

<b>Shelter</b>	<b>Notes:</b>

	DOGS	CATS
<b>A. Live Animal Count at Beginning of Qtr</b>		
<b>LIVE INTAKE DURING QTR:</b>		
B. Stray/At Large		
C. Relinquished by Owner		
D. Owner Requested Euthanasia		
E. Transferred in from another Agency		
F. Other Live Intakes (impounds, births, animals placed in foster care, brought in for TNR, etc)		
<b>G. TOTAL LIVE INTAKE DURING QTR (B+C+D+E+F)</b>		

**DISPOSITION DURING QTR:**

H. Adoption		
I. Returned to Owner		
J. Transferred to another Agency		
K. Other Live Outcome (includes TNRs released)		
L. Died/Lost in Care		
M. Euthanasia- at Owner's Request		
N. Euthanasia-All other than owner request		
O. TOTAL DISPOSITION DURING QTR		
<b>P. Live Animal Count at End of QTR (includes Fosters). (A+G - O)</b>		

**In order to better understand to what degree unowned cats are a source of intake and euthanasia, we need your help.** To the best of your abilities, please indicate what percent and/or how much of CAT intake would you consider unowned (i.e. feral, or community cats) animals:

How many of the euthanized cats would you guess are unowned:

1/Pursuant to section 2-1602(H) of the Agriculture Article which states: "Beginning January 14,2014, each county and municipal animal control shelter and each organization that contracts with a county or municipality for animal control shall report quarterly to the Department on a form prescribed by the Department describing for the previous 3 months: (1) The number of cats and dogs taken in; (2) The number of cats and dogs disposed of, broken down by method of disposal, including euthanasia; and (3) Any other relevant data the Department requires."Please return completed survey by email attachment to [mda.spavandneuter@maryland.gov](mailto:mda.spavandneuter@maryland.gov) or by mail to Maryland Department of Agriculture, Marketing Department (Spay and Neuter Program), 50 Harry S Truman Parkway, Annapolis, MD 21401. Questions call Jane Mallory 410-481-5766 email: [Jane.Mallory@maryland.gov](mailto:Jane.Mallory@maryland.gov) .
