

BOOST YOUR BARN'S BIOSECURITY

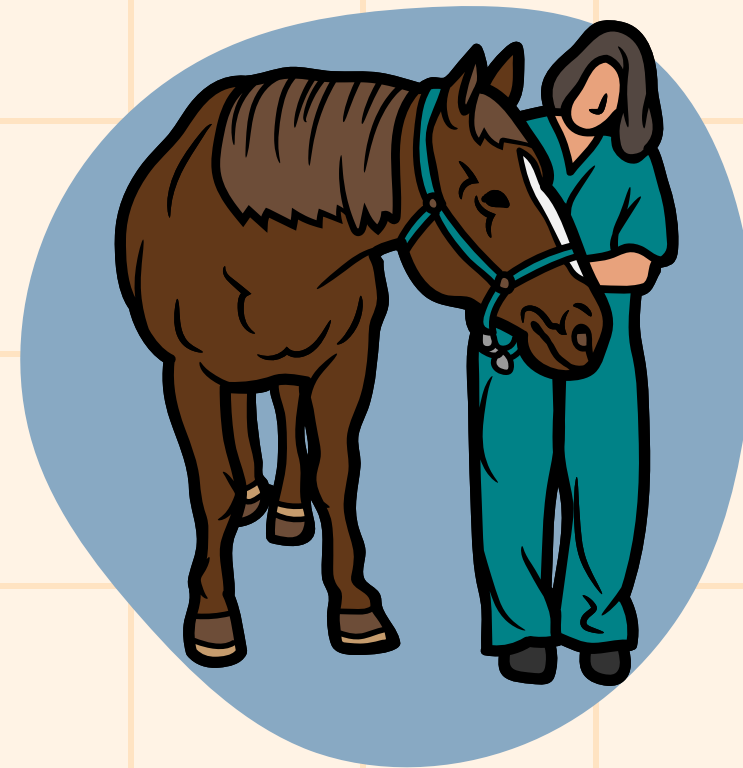

Prioritize Cleanliness

Ideally, stalls should be cleaned every day and kept as clean as possible.

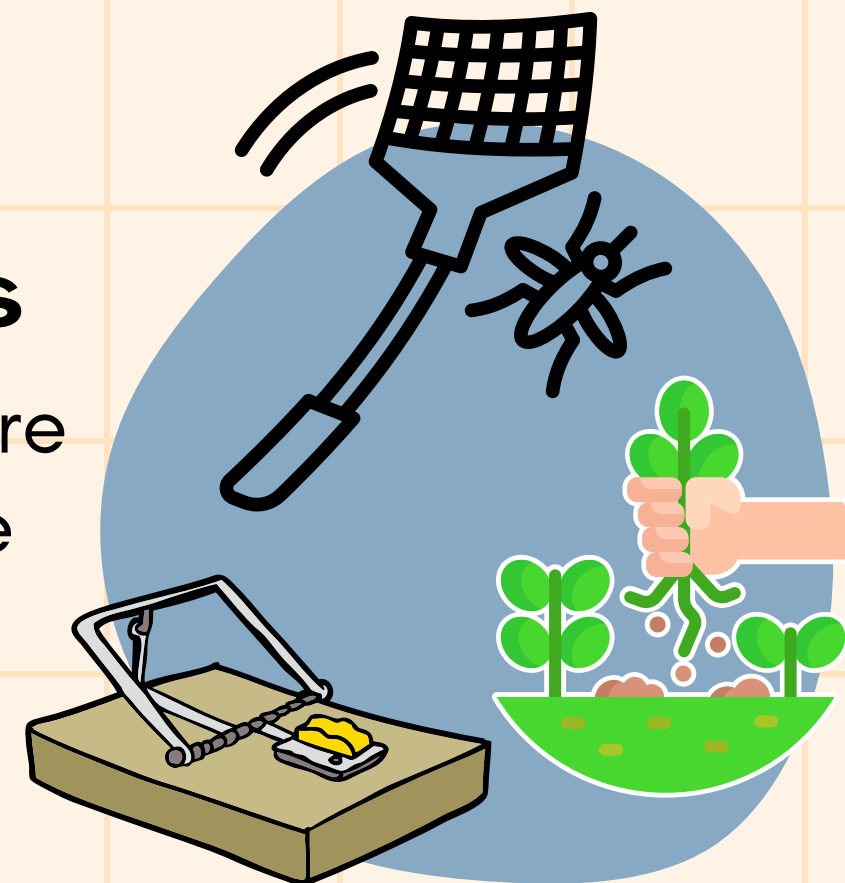

Isolating New or Sick Horses

New horse should be kept separate from your current horses for a minimum of 14 days, ideally 30 days

Vaccinations

Ensure your horses are up-to-date on core and risk-based vaccinations

Controlling Vectors

Insect control, rodent control, weed control, and removing or eliminating standing water.

Limit Access

Limit contact from outside horses and people. Use proper hygiene with visitors and shared equipment.
