MAP would like to thank the Baltimore Jewish Council
and Staiman Design for designing the 2018 Poverty Profiles

Maryland at a Glance

For the last 30 years, the Maryland Alliance for the Poor (MAP) has worked with many members of the General Assembly to create policies and programs that make things a little easier for families in our state who are struggling to make ends meet. Together, we have accomplished some great things!

In its early years, MAP would submit its own proposed budget driving the conversation about safety net funding in Maryland. We helped shape the conversation around welfare reform in the 1990s, which led to Maryland creating a more effective program than most other states. We have helped make Maryland's Earned Income Tax Credit one of the strongest in the country. We were instrumental in the creation of the Service Linked Housing program, Maryland Meals for Achievement, and the Maryland Medicaid Advisory Committee, among others. And, we have helped ensure that the state maintained funding for our safety net programs during economic downturns, a time when people need help the most.

Because our legislature has been willing to consider the needs of people experiencing poverty and take action to improve state policies, Maryland is better off than many

other states. At the same time, we all know we have much more work to do as we fight the headwinds of federal policy changes and a rapidly changing economy.

The fact is, despite our best efforts, there are more people experiencing poverty now than there were 30 years ago. Maryland's poverty rate is 19 percent higher than it was in 1990 – a year that the U.S. economy entered a recession – and there are nearly 200,000 more Marylanders trying to get by on incomes below the federal poverty line. Nearly every county in the state has a higher poverty rate than it had in 1990.

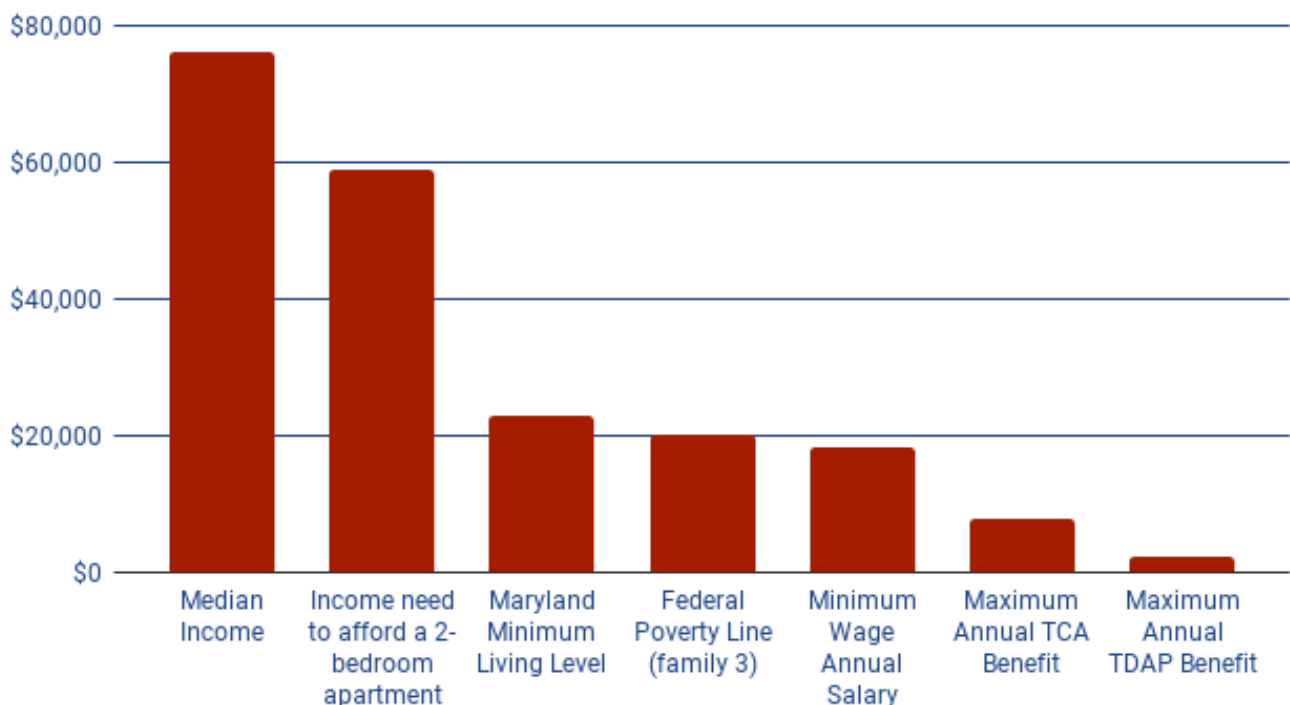

While unemployment rates have continued to decline since the Great Recession, wages often aren't high enough to support a family. When Maryland's minimum wage reaches \$10.10 this summer, it will mean someone working full time can earn just one-third of the income needed to afford a two-bedroom apartment in Maryland.

As you will see in the following pages, many Marylanders also face additional hurdles because of their race, ethnicity, gender, or where they live. Black and Latino Marylanders have a much higher poverty rate than the state as a whole, as do women. And some Maryland communities face higher concentrations of poverty than others.

MAP has compiled the Maryland Poverty Profiles since 1990 as a way to reflect the daily challenges of these hundreds thousands of families in Maryland and each of its 24 local jurisdictions. As we reflect on MAP's 30th anniversary, this year's edition also includes poverty data from 1990 for each county. The Poverty Profiles also show how many state programs – like cash assistance, housing assistance, nutrition assistance, and child care vouchers – are essential tools that help people meet their basic needs. While these programs aren't perfect, and often reach a fraction of the people who need them, the data show how important it is to maintain these services and build on their success.

We hope this information will help inform the ongoing conversations about how we can ensure that everyone in our state is able to have a roof over their heads, sufficient food on the table, and the opportunity to thrive. Maryland has a history of supporting effective programs that help lift people out of poverty. MAP believes that, working together, our state can do even better. We strongly support efforts to address the state's many unmet needs and invest in the success of all Marylanders.
