

Asian Tiger Mosquito Workshop

**Presented by
Maryland Department of Agriculture**

Mosquito Control staff from the Maryland Department of Agriculture will present two workshops (Annapolis & College Park) covering the Asian tiger mosquito, our imported container-breeding mosquito. This mosquito is the number-one pest species statewide, and is very difficult to control due to its habits and habitats.

Workshop will include: general mosquito life cycle; microscope samples; mosquito habitat and habits; in-depth exploration of containers used by Asian tiger mosquitoes & much more.

There will be time at the end for questions.

College Park

June 28, 10 a.m. – 12 p.m.

College Park City Hall (Upstairs Council Chamber)
4500 Knox Road, College Park, MD 20740

Annapolis

July 10, 10 a.m. – 12 p.m.

Maryland Department of Agriculture (Lower Level Conference Room)
50 Harry S Truman Pkwy, Annapolis, MD 21401

Space for both workshops is limited, so we ask that each attendee RSVP to Stormy Keyes (stormy.keyes@maryland.gov) by June 22 for the College Park workshop, or July 3 for the Annapolis workshop. Please include your name and affiliation.
