The winter farmers markets are public spaces where agricultural products from a defined local area are sold by the people who have grown, gathered, raised, caught or produced them, at a farmers market that is in operation during the time period from December 1st – February 28th. These markets may be full time year round markets, part time seasonal markets that cover this time period, or markets specifically created for this season.

The Winter Farmers Market Guide is in addition to the regular year round Farmers Market Directory that is published both in hard copy and online. The Winter Guide is intended to be an online supplement to draw specific attention to those markets open over the winter months.
