

Maryland's Best Website Instructions

Please see the following information on creating or updating your farmers market listing on the Maryland's Best Website.

It is a free voluntary service that the Maryland Department of Agriculture provides, and you create and control the information in your listing. It's a GREAT way for consumers to be able to find you. Please go to the website and check your current listing for correct information for this year, or create one if you have not already.

*****Please note-** this is different than being listed on the Farmers Market page of the Maryland Department of Agriculture website and in the printed Directory - those hold a higher criteria for markets to be eligible to be listed. Maryland's Best listing can be used by any market, even those who don't meet the Directory criteria quite yet (as in brand new first year markets, or markets without any FMNP certified farmers).

Instructions for updating your listing on the Maryland's Best web site.

Go to <http://marylandsbest.net/>

And select "Visit the Farm". Then, on the right side of the page, enter in your email address associated with the listing and your password in the boxes below Producer Login/Register.

Make any necessary edits to your listing and when completed select update. Once you update your listing, the new information will go live on the site.

Don't know your password?

On the same page as above, select "Lost Password", which is under the "Log In" button.

Enter the email address associated with the account and you will be emailed a password within a day.

For any questions or to change the email address associated with your account please contact Audrey Broomfield at Audrey.broomfield@maryland.gov or 410-841-5838.
